

I am writing with concern about the new LPFM that the FCC is considering. How will this effect my current FM stations, especially stations such as K-Love and Air-1 Radio Networks? The majority of my family, friends, and my church family listen to these stations. I have fowarded information re: this consideration to one of our ministers. We have over 8,000 people who attend our church every weekend and I'm hoping to get most of them to respond to this consideration also. I oppose any regulations that would shut these stations down and most people I know feel the same.
